

INTERNATIONAL

regulation made simple

radio spectrum regulatory intelligence americas

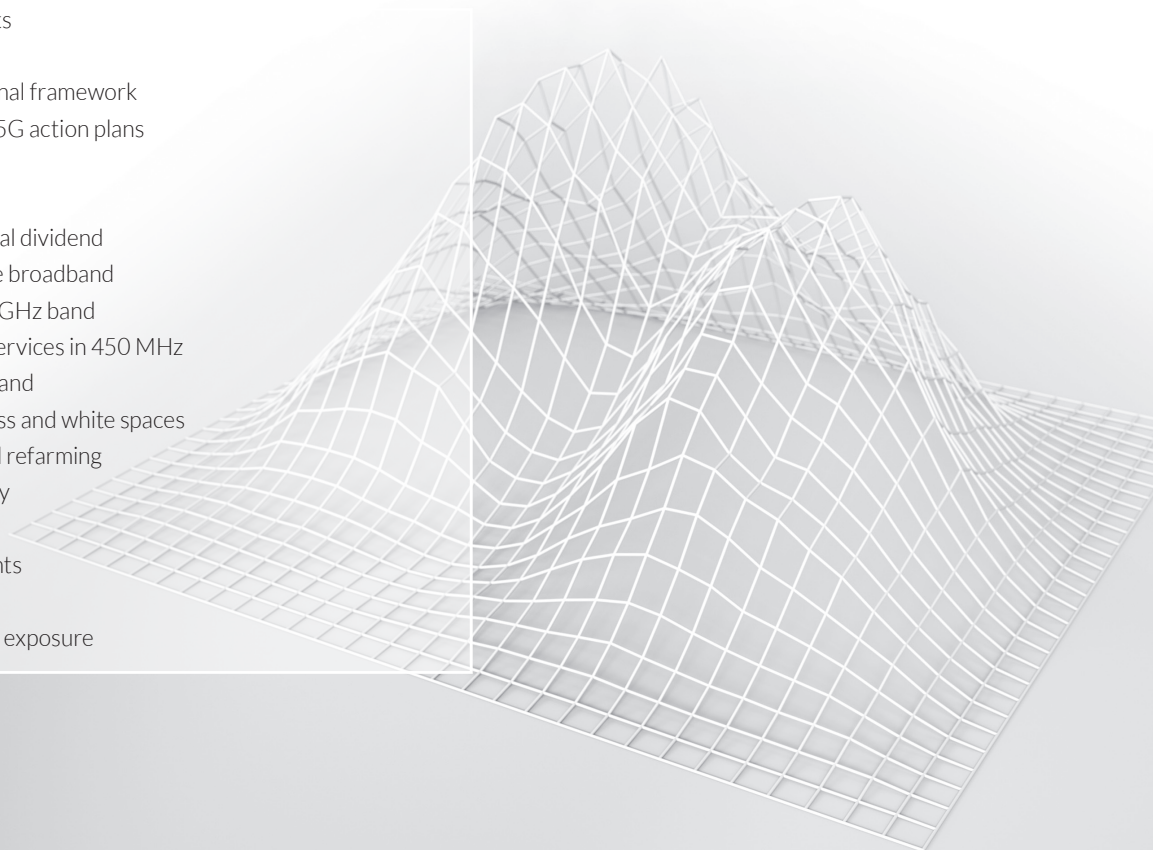

National regulatory authorities in the Americas are making new spectrum bands available for wireless connectivity and are seeking the best auction designs to ensure efficient use of these scarce resources. Spectrum is a key resource for both traditional and new players in the communications sector.

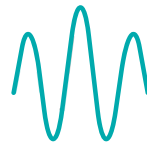

Mobile operators are acquiring more spectrum to deploy 4G and 5G networks and to satisfy the ever-increasing demand for mobile broadband services.

The Americas Radio Spectrum Service monitors developments in spectrum policy and spectrum regulation in the Americas and helps you to keep on top of national developments in 22 countries.
