CULLEN INTERNATIONAL

regulation made simple

sustainability regulatory intelligence europe

Stay well informed on EU environmental policy and its implications for digital companies and those in other sectors.

Sustainability is one of the key issues of our time. Governments around the world are taking urgent action to limit the impact of climate change, move to greener energy sources, and promote more responsible consumption and production.

Against this backdrop, the EU has launched a wide range of different legislative initiatives under the umbrella of the Green Deal, Fit for 55 and the Circular Economy Plan.

The implications of these policies are complex and far-reaching. For the ICT sector in particular, it presents both challenges and opportunities: companies must improve their own environmental performance but digital services can also help other sectors work in a more environmentally-friendly way.

Our Sustainability service deciphers the complexity of environmental regulation and makes it easy to understand how interrelated EU policies affect you. We provide independent, expert insight on the latest developments on sustainability in Europe, helping organisations uncover the facts and make effective decisions.

Topical coverage

EU level

- Certification Framework for Carbon Removals Regulation

CULLEN INTERNATIONAL

sustainability regulatory intelligence europe

Geographic scope

Our Sustainability service covers EU legislation and its implementation at national and company level, focusing mainly on European countries but with occasional coverage of wider global geographies.

Deliverables

Reports	**Flash Messages** Get concise, fast and accurate news alerts on national and EU-level developments. Accessible online or delivered directly to your inbox. **Trackers** Follow the latest developments in EU environmental policy as they unfold. We provide regular updates on the European Green Deal, the Fit for 55 package, the Circular Economy Action plan and more. **Explainers** Need to get up to speed on a new topic? Our Explainers provide simple, objective summaries of key policy concepts and the context behind them.
Benchmarks	**Sustainability Benchmarks** Compare and contrast the different environmental actions, aims and targets taken and set by governments, regulators and ICT companies. Our benchmarks present information in comparative tables for ease of use.
Databases	**Legislation Navigator** Allowing easy access and comparison of EU sustainability legislation.
Client support	**Enquiry Service** Have a question about a specific sustainability topic or policy area? Our experts can help you pinpoint information in our reports and can carry out additional research, subject to conditions.

All deliverables are updated on a regular basis or when a major development occurs.
